Education:

University of Southern California

Expected in 05/2027

Computer Science, B.S. & Game Design and Development B.F.A.

Dean's List, 2023 & 2024 | Academic Achievement Award, 2024

Skills:

- **Machine Learning & Data Science:** Python, NumPy, Pandas, SciPy, Scikit-learn, TensorFlow, PyTorch, MATLAB
 - **Statistical Modeling & Analysis:** Regression, NLP pipelines, Ensemble Models, Predictive Analytics, Reinforcement Learning
 - **Software Development:** C++, C#, Java, Node.js, TypeScript, JavaScript, React, Flask, Express, MongoDB, SQL
 - **Systems & Tools:** REST APIs, Redis, Celery, Git, Jira, Technical Documentation, Adobe Suite, Microsoft Suite
-

Experience:

AI Engineer Intern | INTERDEPENDENT Studios

03/2025 until 05/2026

- Built 97% accurate multimodal forecasting pipeline that directly informed business decisions.
- Wrote business-facing reports and data visuals for pre-production, marketing, and investor stakeholders.
- Developed “The Mailroom” web app integrating OTP authentication, Adobe PDF Embed SDK, and Stripe verification, streamlining client onboarding.
- Collaborated with non-technical executives to communicate screenplay limitations and nuances demographic insights that satisfied business goals.

Software Developer, *Digital Infrastructure & Simulations Teams* | USCRPL

08/2024 until 05/2026

- Designed system blueprints and authored technical documentation for cross-team workflows.
- Modernized web ordering services application, making it more comfortable for our 100+ engineers.
- Collaborated across Embedded Systems, Simulations, and Infrastructure to support active launches.

Member | USC Quantum Ethics and Engineering

01/2025 to Present

- Maintained outreach website and collaborated with USC Physics Department on educational initiatives.
- Participated in hackathons evaluating ethical applications of emerging tech.
- Researched quantum computing and ethics through lab projects, hackathons, and lectures.

Technical Director, *BREAK* | USC Games

01/2024 to 05/2025

- Directed a cross-functional team of 15+ across 5 teams to form creative vision with technical feasibility.
- Presented progress updates, technical roadmaps, and milestone achievements.
- Developed scalable system pipelines and guided conflict resolution to keep the project on track.

Technical Director, *Cat Counselor* | USC Games

12/2023 to 08/2024

- Created a CBT-inspired Unity app with therapeutic dialogue systems.
 - Produced a 50-page technical + design strategy document, bridging research, psychology principles, and user experience goals.
 - Shared findings and design rationale through written and visual materials.
-

Professional Summary:

Driven computer science and game design student with experience in machine learning, data engineering, full-stack web development, user telemetry synthesis, and interactive systems design. Skilled in architecting robust software, optimizing user experiences, and translating research into actionable solutions. Enthusiastic collaborator with a track record of leading projects from concept to deployment. I would love the opportunity to contribute my skills to your company's mission goals through cutting edge technology.
